Table 5. Representative Sample Student Comments (1996-2026)

“Thank you for being such an inspiration. I still carry with me the passion you instilled in me to promote healthy lifestyles for the munchkins I’ll teach. Thank you for doing what you do and for doing it so well.”

“I sincerely appreciate you mentoring me through my research this semester. You challenged me and provided me with great resources so that I could back up my arguments. Not only do I feel I learned a lot about physical education, but I also feel like I learned how to effectively read and extract information from papers---a task I never thought I could enjoy.”

“I will never be able to tell you everything I have learned and used from you. You are an incredible teacher. I wish I could bottle up your passion and energy for PE and give it to everyone! I could have sat in that room all day telling you examples in my teaching when I reflect and think about what you would do, and it pushes me harder. Thank you for all of the opportunities you have given me, the guidance, the knowledge, and the encouragement throughout this program. I would not have made it without you.”

“Dr. McCullick taught us so many things and showed me a viewpoint I had never thought of. He motivated and challenged me to do my best and go above and beyond the ‘required’ elements of the course. I leave knowing that because of the relevance and delivery of the material, I will be able to give something to my students that I couldn’t have before. The information I learned has changed the way I think of things. I will be a better teacher because of this class.”

“You have no idea how encouraging it is to have a teacher who gets fired up about what they are teaching. It is hard at

times, but incredible, to have a teacher who pushes you really hard. I am happy that he pushed me hard because I know he just wants me to be the best Elementary PE teacher that I can be. Because of him, I am going to work my ass off to become the best I can be. I have so much fun teaching children, it almost doesn't seem like work. I am just really fired up about teaching, and Dr. McCullick has a huge part in my decision in wanting to become an elementary school teacher. I definitely did not want to teach little kids when I came into the major, but now that is all I want to do. This was the best class I have ever taken, the best teacher I have ever had, and the most fun class at the same time.”

“I loved this class. While I initially signed up for the class because I needed an elective for my sport management degree that I could take remotely, it quickly became one of the most valuable classes I took in the pursuit of my master's. Dr. McCullick was responsive, understanding, and interesting, and challenged the class while not overwhelming us with work. I knew little to nothing about coaching going into the class, but I gained so much incredible knowledge and insight. Plus, I was able to constantly connect coaching theory back to my personal academic interests, which was so cool.”

“One of the best classes I have taken. If you are a coach or teacher, Dr. McCullick provides you with an opportunity to better yourself and provides you with a platform to research and study all sorts of coaching-related topics. He also teaches you how to evaluate a source of information. A must-take if you want to be a coaching professional.”

“This was a wonderful class, one of my favorites at UGA. Dr. McCullick really cares about educating the students about the Athens community. I really believe in the mission of this course, and if I had time in my schedule next semester, I would take it again. The content is incredibly important, and honestly, the first half should be presented to all students of UGA, just to familiarize them with the people of Athens and what they might go through. Being able to know what Clarke County faces makes me want to be more involved in the community and give back. If more people had this content, I'm sure they would want to do the same, and then hoped just as UGA is a place of elite students, Clarke County can be as well.”

“While I took many interesting courses, the pedagogy class I had with you was the best class I've ever taken. You are a skilled instructor, and I learned so much about teaching by simply watching you teach. You are engaging, insightful, and want your students to learn. That comes across in your passion for your work...when someone asks, 'Who was the best teacher you ever had?' I'm going to tell them it was you.”

“Dr. McCullick is one of the most passionate professors I have ever had. He is very devoted to the PE profession, which is very admirable. His love for the material rubs off on his students. With an early morning class, I have never once felt like I was going to fall asleep. He moves around the classroom when lecturing and includes personable stories that help us retain more material and information easier. Everything we go over is intentional and will be seen and used in the classroom.”

“Dr. McCullick is very passionate about the content, and that comes through in the teaching. He is very open to questions. I think the instruction is very well thought out and organized. It also challenges you. The content was taught in an organized manner, and we were given multiple ways to learn the content through hands-on experience. We were also taught to look at the content from different perspectives, which I felt helped me a lot.”

“My stay in Ireland has been transformative. Observing and participating in GAA sports' training regimens provided me with significant insights into the complexities of athletic preparation. The exposure to extensive sports medicine facilities, as well as the proactive approach to injury prevention and rehabilitation, expanded my knowledge of athlete care and well-being. Beyond academics, the cultural immersion was quite beneficial. Engaging with the local community, attending cultural events, and learning about Ireland's rich traditions have all left a lasting impression on me. The knowledge, abilities, and memories I obtained in Ireland will surely affect my future undertakings and last a lifetime.”

E. Areas of Research

Physical Education/Activity Teacher/Coach Education; Expertise in Teaching & Coaching; Children's Physical Activity.

F. Supervision of Student Research

As a former active faculty member in the *Sport Instruction Research Laboratory*, I worked closely with graduate students, conducting, presenting, and publishing research. Included in the 55 Doctoral and 157 master's degree committees, I have directed four (one co-directed) master's theses and nine (one co-directed) dissertations. Additionally, I have co-authored multiple publications and presentations with graduate students, providing them with valuable experience in academic writing and presentation skills. I have served as an external committee member for theses and dissertations at the *University of Alabama*, *University of Queensland*, AUS, *University of Sydney*, AUS, and *Deakin University*, AUS. At the same time, I co-directed a thesis and a dissertation for students at *University College, Cork*, IRL.

In 2013-14, I served as an advisor to UGA Roosevelt Scholar Karishma Sriram. Duties included meetings and guiding policy research, presented at the *Center for Undergraduate Research Opportunities (CURO) Symposium*. The resulting paper was presented at the *2014 Southeastern Conference (SEC) Symposium*.
